SUMMARY

Data Analyst with professional experience using SQL, Python, Power BI, and Azure Data Factory to transform and analyze data, develop KPI reporting, and support data-driven decision-making. Experienced in exploratory analysis, data quality, dashboard development, data transformation, and automated reporting workflows, with hands-on Snowflake experience through analytics projects. Master's in Management Information Systems with published research in applied analytics and recipient of the Best Research-in-Progress Paper Award at MWAIS 2026.

TECHNICAL SKILLS

- **Data Analysis:** SQL (CTEs, Window Functions, Joins, Query Optimization), Python (Pandas, NumPy, scikit-learn), Exploratory Data Analysis, Statistical Analysis, K-means Clustering, Data Quality
- **Business Intelligence:** Tableau, Power BI, Looker Studio, Excel, Power Query, KPI Development, Data Visualization
- **Data & Cloud:** Snowflake, Azure Data Factory, dbt Core, ETL/ELT, Data Transformation, Data Modeling
- **Tools & Methodologies:** Git, CI/CD, Agile-Scrum, UAT, Technical Documentation

EXPERIENCE

Associate Application Developer - Data & Analytics • Accenture • Pune, India

Apr 2023 - Jul 2024

- Analyzed and transformed data from 5+ heterogeneous sources to support reliable reporting and business intelligence, improving data ingestion reliability by 15% through validation and profiling.
- Developed and optimized SQL transformations within ADF workflows, reducing query execution latency by 10% and producing KPI-ready datasets for executive reporting dashboards.
- Built automated reporting and data processing workflows that reduced recurring data-quality anomalies by approximately 15%, improving consistency of analytical outputs.
- Collaborated with cross-functional technical and business teams during bi-weekly production releases, providing UAT support, participating in code reviews, and validating data and reporting changes.
- Applied Git, CI/CD, and Agile/Scrum practices to support reliable deployment of analytics solutions while maintaining technical documentation and SOPs.

PROJECTS

CTA Performance Analytics Platform

- Analyzed 11.1 billion Chicago Transit Authority rides spanning 25 years using Python, Pandas, and SQL to identify long-term ridership patterns, including a 57% post-2020 decline and subsequent recovery trajectories.
- Conducted year-over-year and mode-level analysis to evaluate bus versus rail ridership trends, translating large-scale transportation data into interpretable performance insights.
- Built a Python ETL workflow to ingest Chicago Data Portal data into Snowflake and developed an interactive Plotly Dash application with four dynamic visualizations for exploring ridership trends and distribution.

Olist E-Commerce Analytics Platform

- Analyzed approximately 1.5 million e-commerce transactions across nine datasets to evaluate revenue, delivery performance, seller activity, and product-category trends.
- Developed three Looker Studio dashboards tracking key business KPIs, including \$13.7M in platform revenue and a 91.9% on-time delivery rate across 74 product categories.
- Used Python, Pandas, Snowflake, and dbt Core to transform raw transaction into structured analytical datasets, including eight staging models and three data marts.

Transit-Walkability Gap Research

 • Independent Researcher • In collaboration with Dr. Neetu Singh, Dept. of MIS, UIS

- Conducted spatial and statistical analysis of 3,322 census block groups using EPA data to identify transit and walkability patterns across the Chicago metropolitan area.
- Applied K-means clustering, feature selection, z-score standardization, and one-way ANOVA to segment geographic areas and validate analytical results.
- Co-authored a peer-reviewed research paper accepted into the MWAIS 2026 Proceedings and received the Best Research-in-Progress Paper Award.

EDUCATION

University of Illinois Springfield • Master's in Management Information Systems

May 2026

Honours: Beta Gamma Sigma (BGS) Honor Society Inductee - Top academic achiever, AACSB-accredited programs

AWARDS & PUBLICATIONS

Best Research-in-Progress Paper Award - 21st Annual MWAIS Conference, Athens, Ohio, May 2026

Chaskar, A. and Singh, N. (2026). Mobility Misalignment in the Age of Hybrid Work: Identifying Transit-Walkability Gaps Through Unsupervised Spatial Analytics. MWAIS 2026 Proceedings.
